## FURNITURE & DESIGN

### HOW TO CARE FOR YOUR NEW BDI FURNITURE

- All glass used in BDi Home Theater furniture designs is tempered safety glass.
- How to clean your BDI Home Theater Furniture: All glass shelves and tops can be cleaned with glass cleaner. Wood and steel parts should be cleaned with a slightly damp (not saturated) clean, cloth towel. If moisture remains, dry the surface with a cloth towel. If needed, a gentle non-abrasive cleanser may be used, but be sure to wipe away all cleaner residue and dry the surface with a cloth towel.
- Many of the office pieces and consoles have the micro-etched black glass as the top surface. If you have a small smudge or minor scratch, you can try a Magic Eraser. One of the good things about the micro-etched black glass is that imperfections can typically be reduced or eliminated by use of Magic Eraser, which you can source from your local grocery store in the cleaning supplies aisle. Simply dampen the glass surface with window/glass cleaner, then rub across the area with a damp Magic Eraser in broad, even strokes using light to moderate pressure. Wipe the area clean with a paper towel or lint-free cloth, then inspect. If the issue persists, repeat. Should not take more than 1-2 passes and a minute or two of effort.
