

FURNITURE TIPPING

Consumer Warning Against Furniture Tipping:

Furniture may sometimes tip over. To avoid damage and injury:

- Do not allow children or adults to climb on furniture
- Do not allow more than one drawer to be opened at a time
- Do not misuse your furniture by placing heavy televisions and other heavy items on adjustable shelves
- Anti tipping restraints are provided by the manufacturer at their discretion and are to be installed by the purchaser. If the factory did not provide the restraint and you feel one is needed, please ask our service department for one.
